MEET HOSTING #UNIFIEDCLOUD

OTHER CLOUD PROVIDERS ASK, "WHAT NOW?" HOSTING ASKS, "WHAT'S NEXT?"

HOSTING delivers secure, compliant managed cloud services and open technologies that empower organizations to increase revenue, streamline expenses and manage risk. We provide customers with unmatched security, support and compliance expertise across a broad portfolio of solutions including public cloud, private cloud, hybrid IT and dedicated environments. Our mission is simple – to provide the best customer experience for companies running business-critical applications in the cloud, supported by the industry's best team.

HOSTING has been consistently recognized by Gartner, Inc. in its *Cloud-Enabled Managed Hosting Magic Quadrant*, citing our forward-looking vision, innovative solutions, and industry-leading customer service. HOSTING is also ranked #14 in the MSPmentor Top 501 Global Edition of managed service providers.

HOSTING UNIFIED CLOUD™

HOSTING set the bar in introducing a complete unified cloud solution on the AWS, Azure and OpenStack cloud platforms. The HOSTING Unified Cloud provides customers with unprecedented flexibility to develop, run and manage custom applications in the cloud without the burden of vendor lock-in. With HOSTING ONE Partner | ONE View, customers have end-to-end support and visibility into their cloud environments.

HOSTING HEALTHCARE CLOUD™

HOSTING led the way in developing the HOSTING Healthcare Cloud™ – a suite of secure, compliant cloud solutions that meets and exceeds compliance requirements for HIPAA and PCI. Multiple security layers are specifically designed to protect electronic medical records (EMR) and electronic protected healthcare information (ePHI).

HOSTING COMPLIANT CLOUD | HOSTING SOLUTIONS

HOSTING offers advanced levels of security and support across our hybrid cloud solutions to fully protect corporate data and mitigate risks organizations subject to HIPAA and PCI compliance. A dedicated team of certified information security and compliance provide sound, straightforward advice for achieving a strong compliance posture. All HOSTING compliant cloud solutions are backed by our 100% Audit Assurance.

HOSTING readily signs Business Associate Agreements (BAAs) with our customers. Complete and concise, the HOSTING BAA clearly outlines roles and responsibilities to ensure that compliance status is achieved in the most cost-efficient manner possible.

HOSTING ENHANCED SERVICES™

HOSTING Enhanced Services alleviates the burden of managing complex IT environments while optimizing their performance. Through an exacting combination of People, Process and Technology, HOSTING Enhanced Services provides organizations with the visibility, support and insights they need to develop and implement forward-thinking initiatives.

HOSTING ADVANCED SOLUTIONS™

HOSTING Advanced Solutions provide customers with a clear path to achieving their business and growth initiatives. From cloud readiness assessments, planning and migration strategies to Oracle, SQL Server and MySQL database services, the HOSTING Advanced Solutions team serves as a catalyst for our customers' success.

CLIENT-DRIVEN, ALWAYS-ON SUPPORT

As part of HOSTING Enhanced Services, customers can call, click or chat to get live 24 x 7 x 365 support from Tier 2 or Tier 3 support specialists. They can also access a robust set of monitoring and management tools via the HOSTING Customer Portal™. HOSTING support experts resolve issues round the clock – regardless of time zone.

HOSTING PARTNER COMMUNITY

HOSTING aligns with a select group of companies that share common cultures, complimentary solutions and an unwavering, customer-centric approach. Leveraging relationships with leading technology companies, HOSTING provides customers with future-focused solutions and support.

SECURE, COMPLIANT DATA CENTERS

Built to scale to the needs of our domestic and international clientele, each HOSTING data center leverages an ITIL-based control environment validated for compliance against HIPAA and PCI DSS. HOSTING data centers are also 100% compliant against OCR and PCI Audit protocols. Every HOSTING data center is designed to take advantage of Green Design Standards while providing unmatched uptimes.
