

TALARI Networks™

the Trusted SD-WAN Leader

SOLUTION OVERVIEW

Talari Networks, the trusted SD-WAN technology and market leader, is engineering the internet and branch for maximum business impact by delivering two solutions - a Failsafe Software Defined WAN (SD-WAN) solution that offers increased capacity, improved reliability, higher quality of experience while lowering costs, and a Branch Simplification solution that enables a secure and consolidated branch infrastructure which delivers application and service deployment flexibility, without sacrificing availability or performance.

With the explosive growth in real time applications, distributed workforces and cloud computing, a company's productivity and customer responsiveness have never been more dependent on the network infrastructure. Because of this, organizations are turning their focus to their wide areas networks (WANs)

and cloud access networks, knowing that having enough bandwidth to support the increased demand and predictable reliability to ensure continuous application availability are key to their success.

Also, IT is under pressure to deliver branch office access with improved quality of experience to an emerging set of applications that exist in a variety of locations, such as the cloud. The deployment of these applications is increasing the types and number of required branch services resulting in added complexity, reduced flexibility, and higher support cost. While branch services and complexity are increasing, the needed technical skills available in the branch to support the new infrastructure is frequently non-existent.

TALARI SOLUTION COMPONENTS

A Talari Networks Software Defined WAN, built on a comprehensive appliances portfolio, engineers the internet and branch for maximum business impact by designing failsafe WANs that deliver superior application reliability, while unlocking the benefits of branch consolidation. Customers have great flexibility in determining how a Talari SD-WAN solution is deployed including at the physical edge, the virtual edge, or in the cloud through the use of Talari's controller, a full suite of appliances and centralized orchestration and analytics platform.

FAILSAFE SOFTWARE DEFINED WAN

A Talari SD-WAN solution delivers a trusted network that ensures application availability while lowering cost. The following are some of the leading capabilities and benefits of this solution:

Change WAN Economics with a Hybrid WAN

Companies can now modify their MPLS WAN infrastructure to incorporate low-cost, high-bandwidth broadband links that Talari technology converts into a business-class network.

Increased Application Quality of Experience

Talari ensures that applications work without interruption, even in the case of link failure or network impairments such as high jitter, delay, or packet loss.

Secure Cloud Access with Visibility

Talari extends the reach of the corporate WAN into the cloud by delivering an encrypted infrastructure with the performance, reporting and control capabilities a company requires to ensure a successful deployment.

TALARI Networks™

the Trusted SD-WAN Leader

BRANCH OFFICE SIMPLIFICATION

A Talari branch simplification solution addresses the cost, complexity and lack of branch technical resource challenges that IT is facing by delivering the following capabilities and benefits:

Effortless Deployment and Management

Deploying a Talari appliance in the branch is fast and simple. By completing 3 steps, IT organizations can have a Talari appliance online and in production with central administration and reporting.

Lower Complexity with Device Consolidation

More than just an SD-WAN device, Talari appliances support popular functions such as firewall and routing. Instead of having multiple devices from a variety of vendors, you can now deploy one Talari appliance.

Scalable and Easy Service Chaining

Talari can make the service chain provisioning process a whole lot shorter and simpler by offering converged services with a common management interface.

TALARI'S LEADING IT BENEFITS

Gain Resiliency,
Reliability
and Superior QoE

Simplify, Automate
and Consolidate
Your Branch

Leverage Internet
and Services
to Reduce Costs

"Talari gives us the quality of service and guaranteed bandwidth we need to meet our service-level agreements for VDI and business applications." - **Dayton Superior**

"I bought Talari to make the network more reliable, and it did exactly what it promised." - **Taft, Stettinius & Hollister, LLP**

"After we implemented Talari...we went from paying \$600 per Mbps to \$100 per Mbps for bandwidth for our distribution centers. We scaled up the WAN bandwidth without scaling up the pricing." - **Driscoll Strawberry Associates**

"We can leverage Talari's capabilities to negotiate the highest bandwidth at the lowest cost without compromising reliability/availability in preparation for more rich content, video and streaming applications in the future." - **Bremer Bank**

"If a WAN link goes down, the call-takers are unaware. The peace of mind and visibility we get with Talari is invaluable." - **Maricopa 911**

"Talari provides the bandwidth we need to sustain our growth in an efficient and reliable platform." - **United Federal Credit Union**
