

Trustwave Corporate Overview

Trustwave helps hundreds of thousands of organizations around the world—ranging from Fortune 500 enterprises to small- and medium-sized businesses—proactively reduce risk, manage costs and enforce protection and control over their sensitive data. And just as importantly, we focus on helping customers gain intelligence, achieve cost and resource efficiency and scale for the future.

Our solutions and services for security and compliance, combined with the intelligence of our elite and unique threat intelligence team, ensure that you can quickly identify security and compliance gaps, establish a best-practices baseline and automate key processes across your environment. That means efficient compliance, a stronger security posture and meaningful, actionable intelligence to help you make faster and more proactive decisions.

Security on Demand

With patented technologies, integrated solutions, a complete managed services portfolio and 24/7 global support, we help you turn security into a predictable operating expense while gaining essential insights—so you can do more with what you have, while strengthening your security posture.

Compliance on Demand

With a multi-compliance framework and automated, cloud-based management platform, we help you find and resolve deficiencies quickly and establish a sustainable process around compliance and risk management no matter what changes in your environment.

Intelligence on Demand

Powered by the experts of Trustwave SpiderLabs, we help you improve threat intelligence across your environment and your business. Through managed security testing, incident readiness and response, and proactive threat research, our elite team works with you to better understand cyber risks and potential vulnerabilities to protect against threats before they impact your business.

Future-Proof Your Business

Cyber security threats have become more frequent and sophisticated, compliance mandates are evolving, and all the while, the way you do business, deliver services and serve your employees and customers is becoming more complex.

Mobility. Business applications. Cloud computing. Social media. Big data.

These days, managing your brand, driving competitive advantage, gaining cost-efficiencies and building a loyal customer following are reliant on how effectively you plan, deploy, secure and manage an entirely new set of business imperatives.

And that's why Trustwave's portfolio has been thoughtfully designed and seamlessly integrated so you can meet these new business challenges head-on.

So whether you need to establish a fully-trusted Bring Your Own Device (BYOD) strategy, offer new Web and mobile applications, or leverage big data to elevate threat and business intelligence, Trustwave's comprehensive solutions can help you get there—safely and securely.

See Security Differently

At Trustwave, when we look at security, we don't just see malware, policy violations or event logs. We see security differently. And that means that we don't just help our customers prepare for threat battles, we help them prepare to win business battles, from the budget to the boardroom.

With award-winning technologies, industry-leading managed services, and elite human threat intelligence no one else can match, we're transforming the ways our customers plan, prepare, integrate and manage their security and compliance programs.

At Trustwave, we are:

	Industry Leaders	We are recognized by industry research firms such as Forrester Research, Inc. [*] and Frost & Sullivan ^{**} , as well as technology publications like <i>SC Magazine</i> , for our technology vision and managed security services leadership. We're also a "go to" forensics resource for many law enforcement agencies around the world.
	Security Experts	Our elite team of security pros, Trustwave SpiderLabs [®] , is one of the industry's most trusted sources for threat research, education and testing. Our threat foresight and threat management capabilities are elevated through a combination of applied research and field testing, which includes thousands of penetration tests and more than 600 security breach investigations each year.
	Compliance Pioneers	With our leadership in compliance and process automation, we are selected by more enterprises for compliance than the next 10 service providers combined. We're at the forefront of solution delivery across almost any compliance or policy framework.
	Technology Innovators	We hold nearly 40 industry patents and receive repeated awards for our technologies. Our innovative global threat database combines our own applied research, field intelligence and industry data sources to help customers prepare proactively for threats and reduce overall risk exposure.
	Cloud Enablers	Our award-winning TrustKeeper [®] portal delivers centralized, integrated and on demand management of compliance and security programs. Through a single, simplified dashboard, our customers streamline and automate processes, improve visibility and control complexity.
